To Whom It May Concern:

I am pleased to write this letter to recommend the services of The Patterson Group who have completed the build out of our Sydney offices.

The design and project management of our new Sydney offices was submitted for tender to local organizations skilled in corporate interior design and project management. Of the bids received The Patterson Group was appointed to the project in November

First and foremost it was extremely beneficial having The Patterson Group so close to our new location to deal with all the facets of setting up an office remotely. They would often have to liaise with our Hong Kong and Washington office at short notice. Despite these time zone constraints lines of communication were always open and efficient. We were kept updated on the progress of the project by means of conference calls, emails and photographs, which was very reassuring.

Using their knowledge and contacts, The Patterson Group was able to accommodate late additions to the project; all the while ensuring our needs as well as the program was met. They were able to provide referrals for the provision of IT equipment as well as a point of contact for ongoing IT support.

I thoroughly recommend The Patterson Group to any organization considering setting up an office remotely.

Sincerely,

Janet Andre  
Chief Administrative Officer  
The Carlyle Group
